## Research Partnerships

### Research and Collaboration Opportunities

The Naval Postgraduate School has long been a testing ground for the Navy's most advanced research. A large portion of the technology that has made our military the most advanced in the world has been developed right on our Monterey campus.

NPS continues to grow in providing cutting-edge research for the military and federal government and is supported by government funds, private funding, the benefits of technology transfer and university-corporate relationships. According to the National Science Foundation's most recent national R&D Expenditures Survey, NPS ranked in the top 25% of institutions in total R&D expenditures. NPS also ranked within the top 30% for national science and engineering (S&E) obligations.

NPS faculty, staff and students interact regularly with research institutions such as the [California State University, Monterey Bay](#); [the University of California at Santa Cruz](#); [the Defense Language Institute](#); [the Naval Research Laboratory](#); [the Fleet Numerical Meteorology and Oceanography Center](#); [the Defense Manpower Data Center](#); [Lawrence Livermore National Laboratory](#); [NASA Ames Research Center](#); and [the Monterey Bay Aquarium Research Institute](#).

The university is aligned with many other activities to increase the effectiveness of its research and education programs. Relationships with DoD activities, state and local governments, and universities, as well as industrial partnerships can be established (as appropriate) through any of the following:

- Memoranda of understanding or agreement
- Educational partnership agreements
- Intergovernmental agency agreements
- Cooperative research and development agreements
